A few days ago a dog caught a fine large turkey gobbler belonging to Monroe Hyder and feasted on the turkey to his satisfaction, but Mr. Hyder naturally does not feel pleased over it as he had planned a Christmas dinner from that bird. When it gets so that the worthless curs begin killing turkeys it is time something serious happened to a few of them.

Recently R. E. Fields brought to this office a sample of wheat he had grown on his farm. He made no special effort to grow it and it was on common upland that had been in cultivation for many years. He thinks he had ten bushels to the acre and feels that if as much effort was put forth to grow wheat as is to grow corn that wheat would prove a profitable crop. There is little doubt that our farmers can grow the wheat needed for their bread for less money than they can buy it. At any rate it is worth trying.

Chief of Police, Hill Lowry, of Crossville, is no respecter of person, but those high up are brought to account for misconduct, violation of law, indecency and offence against the society and good name of his town and people as if they were the very lowest, as some very prominent people will testify. This brings respect for law and order more than all the campaign speeches, platforms and declarations of principles.—Sparta Expositor.

Business men of Crossville surely believe the farmer should use fertilizer to help his crops and build up his land but one would think they do not believe in carrying of that idea into their own business by using the fertilizer of advertising to stimulate and build up their business. That is where they make a serious mistake.

James Davis has completed the work on the chimneys to the new residence of J. B. Johnson and the roof will soon be completed by M. W. West and Percy Beadle. Recently O. H. Overdell cut a small amount of soy beans, measured the ground they came from and in weighing them it was seen that they would produce eighteen tons to the acre of green feed just as cut. Mr. Overdell has nearly five acres that he will allow to produce seed for the market this next year. The soy bean crop is unusually good this year.
